# INVENTORY OF PROGRAMS OFFERED AT NEW JERSEY 2-YEAR INSTITUTIONS OF HIGHER EDUCATION

— DRAFT —

This document reclassifies programs currently offered at 2-year community colleges in New Jersey to prepare students for occupations within career pathways of the 16 career clusters identified by the “States’ Career Cluster Initiative” ([www.careerclusters.org](http://www.careerclusters.org) ). Grouping programs offered by postsecondary institutions into “career clusters” provides educators with a means of: (a) identifying programs operating at postsecondary institutions in New Jersey; (b) developing learning environments in secondary schools that organize programs around broad industry areas or career clusters; (c) identifying a sequence of courses in these programs that will prepare students for entry-level to professional-level occupations for which students can earn college credit during high school; and, (d) designing a plan for developing and implementing secondary programs of study that will provide students with different career options in career clusters. This document may also be helpful to students and parents in locating four-year universities and colleges in New Jersey that offer programs fulfilling students’ career aspirations.

**NOTE:** This document is periodically updated, and was developed based upon analysis of “The New Jersey Commission on Higher Education Program Inventory.” Programs included in this document were reclassified by career cluster and career pathways in accordance with criteria established by the “States’ Career Cluster Initiative” ([www.careerclusters.org](http://www.careerclusters.org)). Option programs and academic/liberal arts programs offered by postsecondary institutions are not included on this document.
