Second Issue 2009-2010

LETTER FROM THE DIRECTOR

Dear PIT Clients and Colleagues:

I would like to take this opportunity to inform you that some of our services may have to change for FY'09-'10 due to funding limitations. We are very appreciative to United Way of Gloucester County for providing flat funding to us, but we are faced with financial adversity since we have a decrease of 18.5% in our funding from the New Jersey Department of Community Affairs Division on Women. The deficit is resulting in no salary increases, staff hours being cut back, fewer workshops being offered, reducing the publication of our newsletter from four times a year to three, reducing our mailing to save on postage, and a number of other penny pinching applications.

The staff of People in Transition is asking that you work with us in getting through this financial crisis. Please be aware that you can save the agency money by providing your email address to us, or by accessing our workshop schedule on www.gccnj.edu, click on quick links, click on displaced homemakers. Please be patient if you have to wait a longer period of time for an appointment due to decreased staffing hours, or wait a longer period of time to participate in one of our workshops due to less workshops being offered. We also ask that you continue to contact your legislators and let them know the impact that People in Transition has had in helping you through such a horrific time in your life and impress upon them the need for their support in funding the 15 displaced homemaker centers throughout the State of New Jersey!

Once again, thanks for your support and please feel free to contact me at jlabuz@gccnj.edu with questions.

Jeannie LaBuz, Director

Forgiveness - A Healing Journey

An eight session workshop series for individuals who have been hurt by people or events in their lives.

Individuals who have been emotionally and/or physically hurt in the past may continue to suffer many years later as a result of their prior experiences.

As a result of prior hurt and pain, some of the following situations may occur. An individual may experience high levels of anger and frustration, may be afraid to trust other people due to the fear of being hurt again, may engage in self destructive behaviors, or may even treat loved ones badly.

During this eight-session workshop, individuals will learn ways to relieve the hurt and pain so that they can move on with their lives. They will also learn how to let go of anger. Holding on to anger requires a great deal of emotional energy and keeps a person tied to the past. In order to move on to a healthier life in the future, a person must make a conscious decision to let go of anger from the past. Learning to forgive is an important part of the healing process.

Do You Know Your Family Health History

Health care professionals have known for some time now that common diseases - heart disease, cancer, and diabetes - and even rare diseases like hemophilia, cystic fibrosis, and sickle cell anemia - can run in families. If one generation of a family has high blood pressure, it is not unusual for the next

generation to have similarly high blood pressure.

Tracing the illnesses suffered by your parents, grandparents, and other blood relatives can help your doctor predict the disorders to which you may be at risk and take action to keep you and your family healthy.
